OUR PATENT SEARCH SERVICES

Patent Search Services for Every Stage of the Innovation Lifecycle

From first idea to filing, product launch and litigation, choose the patent search that matches your business decision, each one scoped, researched and reported by technical specialists.

Prior Art Search

Uncover earlier patents and publications before you file, draft or defend, so every IP move starts from solid evidence.

Pre-filing

Patent drafting

Novelty Search

Find out how new your invention really is by comparing it with the closest patent and non-patent disclosures.

Inventors

Startups

Patentability Search

Gauge the strength of an invention before you invest in filing, and pinpoint the claim features worth refining.

Filing strategy

Claim scope

Freedom to Operate (FTO) Search

Launch with clarity: identify third-party patents that may affect your product in target markets, mapped feature by feature.

Product launch

Market entry

Invalidity Search

Find earlier evidence that challenges granted claims, strengthening opposition, post-grant review and litigation strategy.

Litigation

Opposition

Non-Patent Literature (NPL) Search

Go beyond patent databases into journals, conference papers, technical standards, theses and product documentation.

Standards

Scientific literature

State-of-the-Art Search

See the technology landscape at a glance: key players, competing approaches, influential publications and white space.

R&D strategy

Patent landscape

Patent Watch & Monitoring

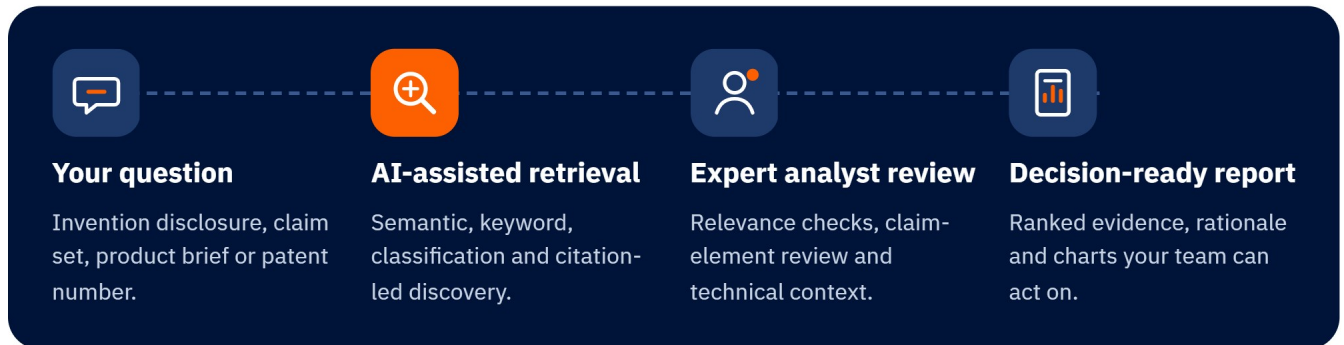

Stay ahead of competitors with ongoing alerts on new filings, applicants and the technologies that matter to you.

Competitive intelligence

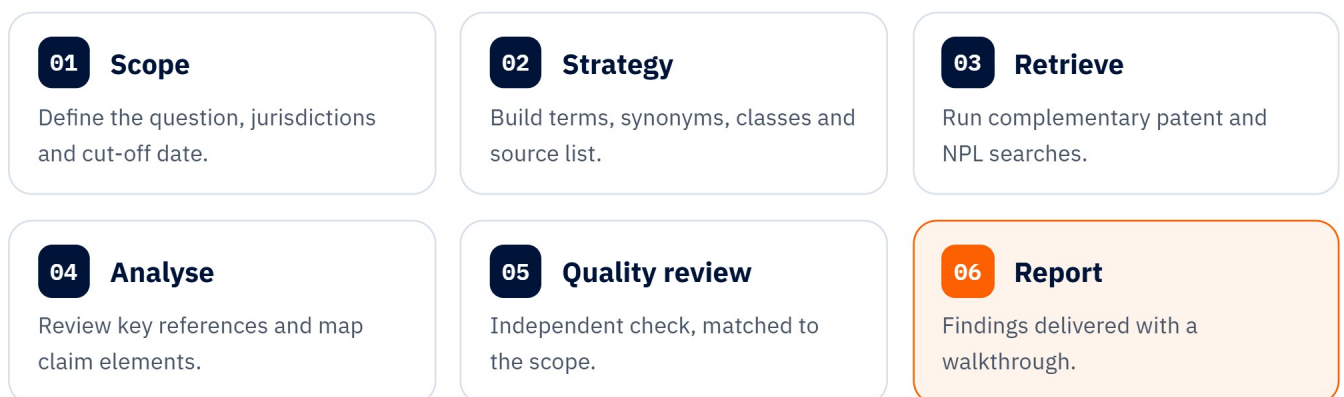

Alerts

HOW OUR PATENT SEARCH WORKS

AI-Powered Patent Search, Validated by Expert Technical Analysts

FROM BRIEF TO REPORT

PATENT SEARCH DELIVERABLES

Patent Search Reports Built for Confident IP Decisions

Each report is tailored to your objective, with deliverables your attorneys, engineers and leadership can put to work straight away.

- ✓ **Executive summary** with key findings and their business implications.
- ✓ **Ranked prior art** across patent and non-patent literature, with analyst notes.
- ✓ **Relevance rationale** explaining why each reference matters.
- ✓ **Claim charts** mapping references to claims or product features.
- ✓ **Search strategy record** of queries, classes, sources and cut-off date.
- ✓ **Editable files:** PDF report plus structured spreadsheet.

INDUSTRIES & TECHNOLOGIES

 Semiconductors & electronics	 Telecom, 5G/6G & standards	 AI, software & data
 Medical devices	 Pharma & biotech	 Automotive, EV & mobility
 Industrial automation	 Energy & cleantech	 Materials & chemicals

WHO WE SERVE

- **Founders & startups** validating inventions before filing or fundraising.
- **R&D teams** exploring technical directions and white space.
- **In-house IP & legal teams** planning prosecution, licensing and portfolio moves.
- **IP law firms** adding technical search capacity.
- **Universities & research labs** assessing disclosures for tech transfer.

TALK TO OUR PATENT SEARCH TEAM

Planning a filing, a launch or a challenge? Let's scope your patent search.

Share an invention disclosure, claim set, product description or patent number to get started.
